

How to use your edible WAFER cup cake toppers

Best stored in a cool dry place

1. Important:- Please store your cake toppers in the zip lock bag and board backed envelope provided and away from any extremes of temperature or high humidity, until you are ready to use it. Heat and humidity can adversely affect the toppers
2. Remove your toppers from the bag and cut them out with sharp, clean, dry scissors. Always make sure your hands are dry when handling wafer toppers.
3. Put your toppers on the cup cakes with pale coloured butter icing or similar (ready made is fine!). This can be piped or simply spread on top of the cakes. Glace icing can be used, but has a high water content and can cause the toppers to curl at the edges

*** The toppers will keep for at least 6 months, as long as they are kept in the bag, out of direct sunlight and extremes of temperature.**
